Subject Index

Air pollution control
  planning of industrial sites in a city from the point of view of, 171
Air-conditioned building(s)
  health and well-being disorders in: comparative investigations of the "Building Illness" syndrome, 277
  intermittently, an analysis of stochastic properties of the heat load in an, 259
Apartments
  passive solar popular, investigation of the thermal performance of, in Israel using small-scale physical models, 301

Building
  methodology of applied climatology in planning and, 1
"Building Illness" syndrome
  health and well-being disorders in air-conditioned buildings: comparative investigations of, 277
Built environment
  a philosophy for teaching wind in the, 157
Built-up area
  disperson of accidentally released gases in a, 163

Cities
  winter, developing climate-responsive, 11
Climate
  and weather protection systems in settlement planning in Arctic regions of Northern Norway, 23
  as a factor of a planning project — example of Dortmund Bornstrasse, 129
  indoor, comfort requirements in, 249
  urban, as a parameter for urban development, 137
  urban canopy layer, and street design, 103
  urban, green for melioration of, 289
Climate function maps
  and urban planning, 123
Climatic approach
  to town planning in the Arctic, 41
Climatic aspects
  in rural settlement development in hot, arid zones: a case study of the Central Jordan Valley, 73
Climatic conditions
  settlement and housing design with special regard to, in cold and polar regions — examples from Northern Norway, 33
Climatic factors
  considering, for urban land use planning in the Sahelian zone, 91
Climatological uses
  of plants for solar control and the effects on the thermal environment of a building, 181
Climatology
  applied, the methodology of, in planning and building, 1

Comfort requirements
  in indoor climate, 249
Courtyard
  absorption of solar energy in a, 309

Design rating system
  the 5 star, for thermally efficient comfortable housing in Australia, 65
Development
  urban, the urban climate as a parameter for, 137

Gases
  accidentally released, dispersion of, in a built-up area, 163
Green
  for melioration of urban climate, 289

Health
  and well-being disorders in air-conditioned buildings: comparative investigations of the "Building Illness" syndrome, 277
Heat storage process
  an analysis of, in wet soil solved as a coupled problem, 239
Heating load
  an analysis of stochastic properties of the, in an intermittently air-conditioned building, 259
High-rise building
  quantitative determination of pedestrian comfort near a; a case study, 149
Hot, arid zones
  climatic aspects of rural settlement development in; a case study of the Central Jordan Valley, 73
Housing
  in Australia, the 5 star design rating system for thermally efficient, comfortable, 65

Industrial sites
  planning of, in a city from the point of view of air pollution control, 171

Lighting
  roof, and sun protection, 283

Meteorological conditions
  influence of, on inhabitant behaviour in dwellings with mechanical ventilation, 267
Moisture variations
  an analysis of temperature and, in the ground under natural climatic conditions, 221

Pedestrian comfort
  quantitative determination of, near a high-rise building; a case study, 149
Planning
  methodology of applied climatology in, and building, 1

© Elsevier Sequoia/Printed in The Netherlands

of individual sites in a city from the point of view of air pollution control, 171
town, a climatic approach to, in the Arctic, 41
urban land use, considering climatic factors for, in the Sahalian zone, 91
urban, results from the research program STADTKLIMA BAYERN for, 115
Planning project
climate as a factor of a, demonstrated by the example of Dortmund Bornstrasse, 129
Plants
climatological uses of, for solar control and effects on the thermal environment of a building, 181

Radiation
direct, in clear skies, modelling the time correlation in hourly observations of, 201
Roof lighting
and sun protection, 283

Settlement and housing design
with special regard to local climatic conditions in cold and polar regions — examples from Northern Norway, 33
Settlement development
rural, climatic aspects of, in hot, arid zones: a case study of the Central Jordan Valley, 73
Settlement planning
in Arctic regions of Northern Norway, climate and weather protection systems in, 23
Skies
clear, modelling the time correlation in hourly observations of direct radiation in, 201
Soil
wet, an analysis of the heat storage process in, solved as a coupled problem, 239
Solar apartments
popular, passive, investigation of the thermal performance of, in Israel using small-scale physical models, 301
Solar control
climatological uses of plants for, and effects on the thermal environment of a building, 181
Solar energy
absorption of, in a courtyard, 309
STADTKLIMA BAYERN
results from the research program, for urban planning, 115
Street design
and urban canopy layer climate, 103
Sun protection
roof lighting and, 283

Temperature
an analysis of, and moisture variations in the ground under natural climatic conditions, 221
Thermal environment
effects on the, of a building, climatological uses of plants for solar control and, 181
Thermal performance
investigation of, of passive solar popular apartments in Israel using small-scale physical models, 301
Thermally efficient housing
the 5 star design rating system for comfortable, in Australia, 65
Town planning
a climatic approach to, in the Arctic, 41

Urban canopy layer climate
and street design, 103
Urban climate
as a parameter for urban development, 137
green for melioration of, 289
Urban land use planning
considering climatic factors for, in the Sahelian zone, 91
Urban night temperature
control of, in semi-tropical regions during summer, 213
Urban planning
and climate function maps, 123
results from the research program STADTKLIMA BAYERN for, 115

Ventilation
mechanical, influence of meteorological conditions on inhabitant behaviour in dwellings with, 267

Weather protection systems
climate and, in settlement planning in the Arctic regions of Northern Norway, 23
Wind
a philosophy for teaching, in the built environment, 157
Winter cities
developing climate-responsive, 11

Contents

Preface vii

Acknowledgements viii

The methodology of applied climatology in planning and building 1
A. Bitan (Tel Aviv, Israel)

Developing climate-responsive winter cities. 11
N. Pressman (Waterloo, Ont., Canada)

Climate and weather protection systems in settlement planning in the Arctic regions of Northern Norway 23
A. K. Sterten (Trondheim, Norway)

Settlement and housing design with special regard to local climatic conditions in cold and polar regions — examples from Northern Norway 33
A. B. Børve (Bodø, Norway)

A climatic approach to town planning in the Arctic 41
L. R. Zrudlo (Québec, Qué., Canada)

The 5 star design rating system for thermally efficient, comfortable housing in Australia. 65
J. A. Ballinger (Kensington, N.S.W., Australia)

Climatic aspects in rural settlement development in hot, arid zones: a case study of the Central Jordan Valley 73
O. Potchter (Tel Aviv, Israel)

Considering climatic factors for urban land-use planning in the Sahelian zone 91
R. K. Herz (Karlsruhe, F.R.G.)

Street design and urban canopy layer climate 103
T. R. Oke (Vancouver, B.C., Canada)

Results from the research program 'STADTKLIMA BAYERN' for urban planning. 115
H. Mayer (München, F.R.G.)

Climate function maps and urban planning. 123
W. Bründl (München, F.R.G.)

Climate as a factor of a planning project — demonstrated by the example of Dortmund Bornstrasse 129
W. Beckröge (Essen, F.R.G.)

The urban climate as a parameter for urban development 137
L. Katzschner (Kassel, F.R.G.)

Case study: quantitative determination of the pedestrian comfort near a high-rise building 149
A. Lohmeyer, H. Fasslrinner, H. Schmitt and K. Fehrenbach (Karlsruhe, F.R.G.)

A philosophy for teaching wind in the built environment 157
J. A. Wisse (Eindhoven, The Netherlands)

The dispersion of accidentally released gases in a built-up area 163
W. Bächlin and E. J. Plate (Karlsruhe, F.R.G.)

Planning of industrial sites in a city from the point of view of air pollution control 171
M. Nowicki (Warsaw, Poland)

Climatological uses of plants for solar control and the effects on the thermal environment of a building. 181
A. Hoyano (Kanagawa, Japan)

Modelling the time correlation in hourly observations of direct radiation in clear skies 201
H. Madsen and P. Thyregod (Lyngby, Denmark)

Control of urban night temperature in semi-tropical regions during summer 213
M. Moriyama and M. Matsumoto (Kobe, Japan)

An analysis of temperature and moisture variations in the ground under natural climatic conditions 221
M. Matsumoto (Kobe, Japan) and A. Iwamae (Osaka, Japan)

An analysis of the heat storage process in wet soil solved as a coupled problem 239
M. Matsumoto and N. Kotera (Kobe, Japan)

Comfort requirements in indoor climate 249
P. Höppe (München, F.R.G.)

An analysis of stochastic properties of the heating load in an intermittently air-conditioned building. 259
S. Hokoi and M. Matsumoto (Kobe, Japan)

Influence of meteorological conditions of inhabitants' behaviour in dwellings with mechanical ventilation 267
H. Erhorn (Stuttgart, F.R.G.)

Health and well-being disorders in air-conditioned buildings; comparative investigations of the "Building Illness" syndrome 277
P. Kroeling (München, F.R.G.)

Roof lighting and sun protection 283
H. W. Bodmann, K. Eberbach and P. Reuter (Karlsruhe, F.R.G.)

Green for melioration of urban climate 289
F. Wilmers (Hannover, F.R.G.)

Investigation of the thermal performance of passive solar popular apartments in Israel using small-scale physical models. 301
D. Wegner, S. Hassid and M. Poreh (Haifa, Israel)

The absorption of solar energy in a courtyard 309
R. Trenkle (München, F.R.G.)
